
$pp \to W^+Z + 0, 1j$, FxFx–Delta, $q_{cut} = 70$ GeV, Pythia 8.317
Merged
Sample @0
Sample @1
Old hard scalar
Geometric mean
Cross section per bin [pb]
New / old
$p_T(W^+Z)$ [GeV]
Ratio band: old error; bars: new error / old central. No cross-run covariance. Old denominator > 3 statistical errors.
