

(a) area under the curve drawn in the  $C_{nn}$  pane -- the four diagonal blocks carry all of it

(b) contribution to  $\langle \cos \theta_{\ell^+}^n \cos \theta_{\ell^-}^n \rangle$  ( $\propto C_{nn}$ ) -- only  $(I, I)$

(c) the contrast:  $\langle \cos \theta_{\ell^+}^k \cos \theta_{\ell^-}^k \rangle$  ( $\propto C_{kk}$ ) -- only the diagonal blocks

grey: diagonal blocks    blue: single- $I$  blocks    red: the doubly-interfering ( $I, I$ ) block
