Sudakov correction: one million fresh events per process
v3 and v4 use independent source samples; bands include correlated statistical errors
Drell–Yan — first emission
Higgs (gluon fusion, HEFT) — first emission
$t\bar{t}$ — first emission
Drell–Yan — after shower
Higgs (gluon fusion, HEFT) — after shower
$t\bar{t}$ — after shower
Matched / same-event baseline
Hard-system p_T [GeV]
v3: no Sudakov ratio
v4: corrected ratio
